

Discover the world of flying

## COSMOS 2

	XS	S	M	L
FLAT AREA	24.2m <sup>2</sup>	25.80m <sup>2</sup>	27.3m <sup>2</sup>	29.3 m <sup>2</sup>
PROJECTED AREA	21m <sup>2</sup>	22.22m <sup>2</sup>	23.44m <sup>2</sup>	25.47m <sup>2</sup>
FLAT WINGSPAN	11.18m	11.55m	11.88m	12.34m
PROJECTED SPAN	9.05m	9.29m	9.48m	10.03
ASPECT RATIO	5.17	5.17	5.17	5.17
PROJECTED AR	3.95	3.95	3.95	3.95
MAX CHORD	2.65	2.73	2.81m	2.93
NUMBER OF CELLS	50	50	50	50
GLIDER WEIGHT	4.7	4.9	5.2	5.3
TAKE OFF WEIGHT	60-85	70-95	85-105	95-120
CERTIFICATION	LTF/EN B	LTF/EN B	LTF/EN B	LTF/EN B

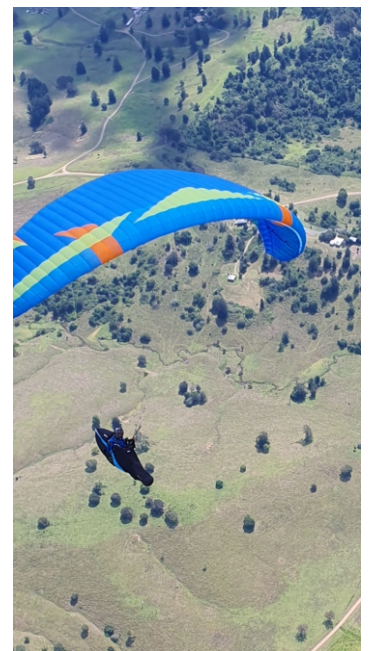

After 5 years of releasing the original Cosmos, we are proud to introduce Cosmos2. Following our technological advancements in paragliding air foil technology, sail tensioning, line- and risers' geometry, we are now able to introduce these amazing improvements into this glider.

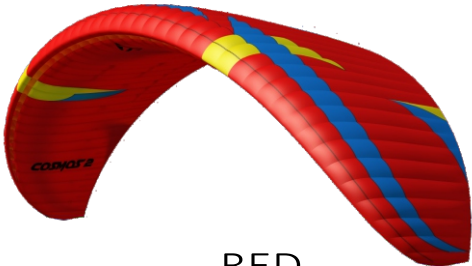

The Cosmos2 is even more exciting and fun to fly. A glider with enough performance to fly the world, be it a 200km flight in the flatlands of Australia or big triangles in the Alps. Cosmos2 can do it all. Offering incredible passive safety and an easy and intuitive rear riser steering. The speed rear riser steering enhances the feel and authority for cruising the skies and gliding from one thermal to another in total control. Cosmos2 allows the pilot to focus more on the conditions and less on the glider overhead.

Cosmos2's new air foil is our latest creation. It is a revolutionary air foil as it offers enhancements in performance adding further collapse resistance and pitch stability ultimately translating to a more enjoyable and safer flying experience.
